+ employment

Agilant Solutions

Sr React Developer

Dec. 2022 to Current

I work with React and TypeScript to create multiple applications that help keep track of client inventory needs.

- Architect and high-level planning of data movement in applications
- Created reusable and flexible UI components
- Mentored developers, enforcing coding standards
- Ensure coding standards are in place and followed

Platypus Technologies

Application Developer

Oct. 2021 to Oct. 2022

I worked with React and React Native to create and maintain web and mobile applications for various clients.

- Performed work in TypeScript while working with React and React Native
- Worked with React Admin to create an interactive dashboard
- Developed unit and end-to-end tests to ensure code reliability
- performed back-end tasks in Nest.js and Laravel

D'aprile Properties

Full Stack Developer

Nov. 2020 to Sept. 2021

I worked with Laravel 8 as a full-stack developer and created a custom CMS for real estate sites. I also maintained and developed features for an application using Tailwind, Vue.js, and Laravel that helps real estate agents track performance.

Dealer Inspire

Front-end Web Developer

June 2018 to Apr. 2020

I was a front-end WordPress Web Developer. As a front-end web developer for Dealer Inspire I :

- Created front-end websites for automotive dealerships using HTML, SCSS, and jQuery.
- Maintained front-end websites for automotive dealerships using HTML, SCSS, and jQuery.
- Work closely with project managers to make sure goals are hit for websites in a timely manner.
